

ADK46ers Trail Crew 2021 COVID-19

Risk Prevention Guidelines

1. We will be screening participants each morning. Screenings will include: checking temperature with a no-touch thermometer and asking all participants if they are displaying any symptoms associated with COVID-19.
2. If any participant has tested positive or has come in contact with anyone who has tested positive for COVID-19 in the previous 2 weeks, they will not be allowed to participate.
3. Everyone participating in the trip must bring at least 2 face coverings. Face covering must be worn whenever 6-foot distance cannot be maintained. Participants should bring their own supply of hand sanitizer as well.
4. Tools will be assigned to each participant at start of the day. If tools need to be exchanged for any reason, they will first be sanitized with a bleach-water solution.
5. Group assignments will be contained to 5 or less. Congregation in larger group sizing will not be allowed.
6. If any participant has any symptoms, they will be asked to isolate from the group and be removed from the activity.
7. Any participant staying at preapproved NYSDEC campground as listed on our schedule and as courtesy of the NYSDEC for the event will need to bring their own tent and personal camping gear and adhere to item 3.
8. Participants who can verify that they received a complete round of vaccinations will be afforded certain leeway, subject to case-case permission by a Trailmaster. Each participant may be asked if they have been vaccinated.
